How Does Bausparen Work?

¹Income limits and other conditions apply

²If eligible

³and further allocation requirements have been met

Saving equity capital

In the Bausparen model, the customer enters into a **Bauspar contract** for a specific sum and saves about half of this amount in regular instalments

Taking out loans

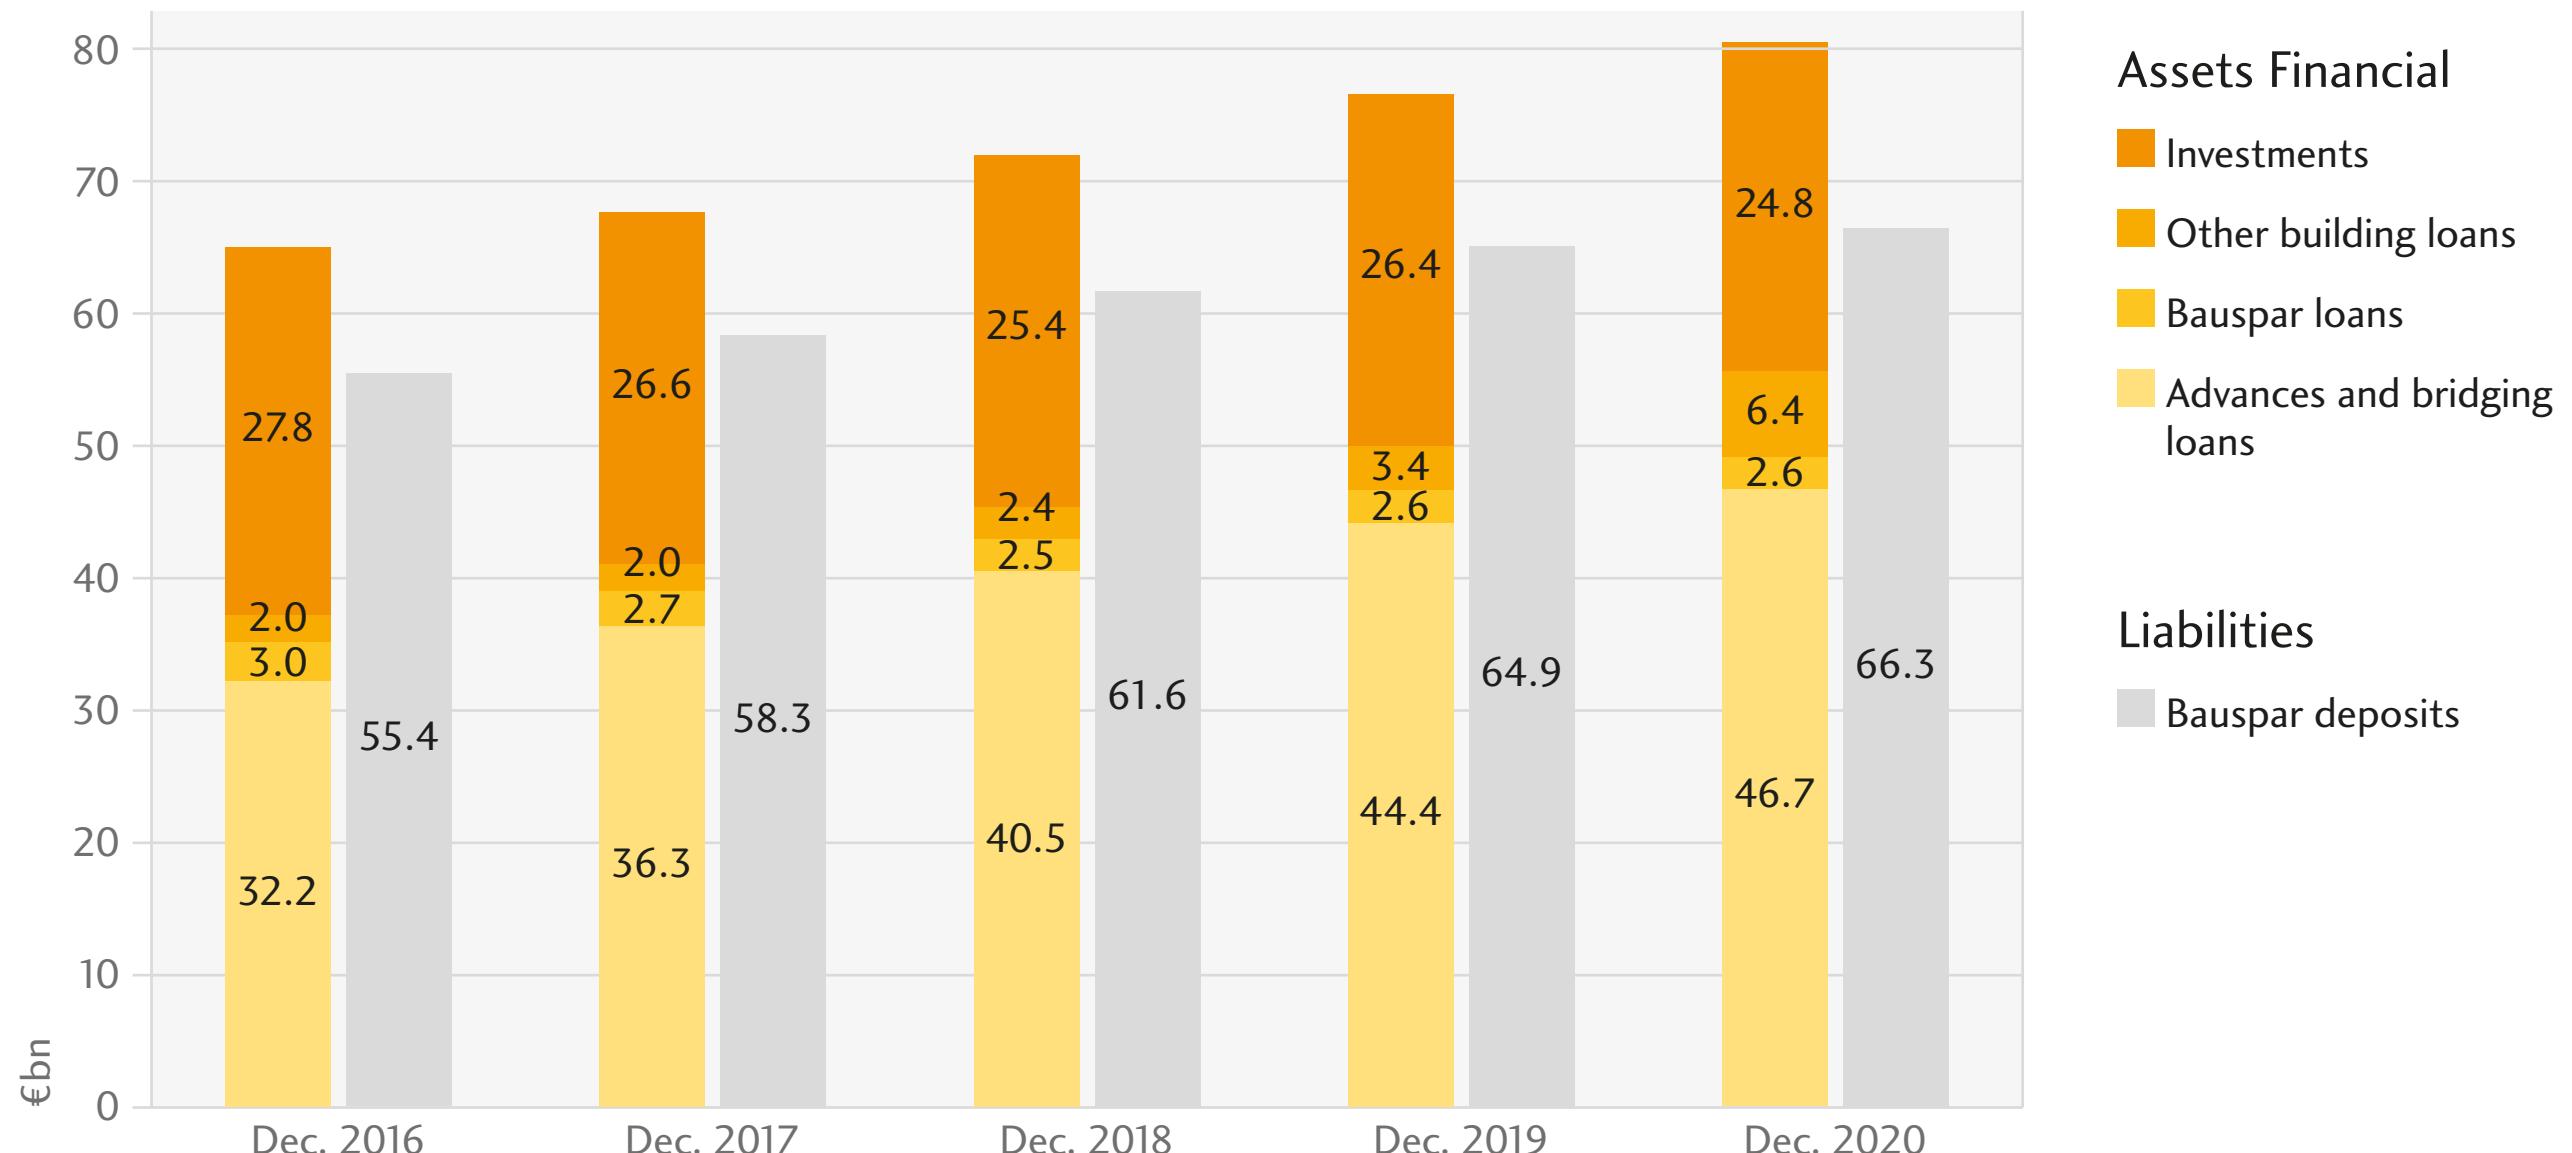

Once the agreed portion of the Bauspar sum has been saved³, a **low-interest Bauspar loan** can be taken out for the remainder

Paying back convenient instalments

In the **repayment phase**, the customer repays the loan in regular instalments

Our Sustainability Concept

We have been producing a sustainability report since 2012, which focuses on the following action areas:

Products and Services

- Products and services have a positive CO₂ impact, measurement in the credit portfolio
- Support for our customers in asset formation and private retirement provision

Responsible Employer

- HR policy based on stages of the employee life cycle, e.g. work-life balance, operational health management
- High level of employee satisfaction and identification with employer

Sustainable Banking

- Eco-efficiency in banking
- Climate strategy of the DZ BANK Group
- External commitments (e.g. Foundation 2°, Association for the environmental management and sustainability in financial institutions)

Social Commitment

- Active role as a corporate citizen in the region
- Specific support for volunteering and social and cultural projects
- Engagement with foundations and alliances

Schwäbisch Hall customers saved around 538,000 tonnes of CO₂ with our support in 2020

Types of loan use with positive CO₂ impact

Among other projects, we provide financing for:

 **New housing construction**

 **Modernisation**

 **Photovoltaics**

Positive CO₂ impact

Calculation of the positive CO₂ impact for each loan

(with intended use of modernisation used as an example)

1 What is the size of the **space** to be modernised with the refurbishment expenditure?¹

2 By how much will the refurbishment reduce **energy consumption**? Assumption: saving of **84 kWh/year** per square metre modernised²

3 What is the amount of CO₂ **emissions** that will be **avoided** as a result of the refurbishment? Assumption: approx. 0.3kg of CO₂ will be avoided per kilowatt hour saved³

¹BSH calculates relevant refurbishment space using comparative figures from the German Economic Institute (IW), which classifies up to 50% of refurbishment expenditure as energy-related measures and assumes average energy-related capital expenditure of €350 per square metre.
